Routes

We strongly recommend using a hiking app (e.g. Komoot) for route guidance!

Download the route before the start so that it can be used in offline mode. For the 20km route you should take at least one extra battery, for the 50km route two extra batteries (powerbank)!

You can find the GPX data for download on our webpage under "Important information".

Further important information for your participation:

- Remember to always have the mobile phone with you, the number of which you gave when you registered. You must have sufficient battery power and should set the mobile phone to loud so that we can reach you in an emergency.
- Have your hiking pass stamped and the QR code scanned at each checkpoint (refreshment point) so that we know that we haven't lost anyone along the way.

- If you have to give up on the way and have friends or family pick you up: Please inform our head office on 26 68 77 01! Otherwise we will have to go out at night to look for you. You can reach us at this telephone number. Even at night, during the event.
- Basically, the Code de la Route applies and all participants must observe the traffic rules. This also means stopping at red lights, always walking on pavements, and being extra careful when crossing roads.
- The hiking route is not a running route, which is why the checkpoints (refreshment points) are only in operation after a certain time (fastest hiking speed: 6 km/h!).
- The route is not suitable for prams.

In principle: Please keep the environment clean and protect the forest!
